ABOUT ME

I am a passionate and driven second-year engineering student with hands-on experience in AI/ML, web development, and data analytics through internships and project work. I thrive on learning new technologies and solving real-world problems. With a strong foundation in both development and data-driven thinking, I am eager to build a successful career in tech and contribute meaningfully to innovative projects.

ACCOMPLISHMENTS

successfully completed:

- Remote job simulation in Data Analytics from Deloitte, Australia
- Gen AI Study Jams '24
